

SKYGARDEN

SKYGARDEN

BY AUSWIDE BUILDING

Are you just a few metres away from that million-dollar view?

Are you conflicted with the decision that current small house lots impose?

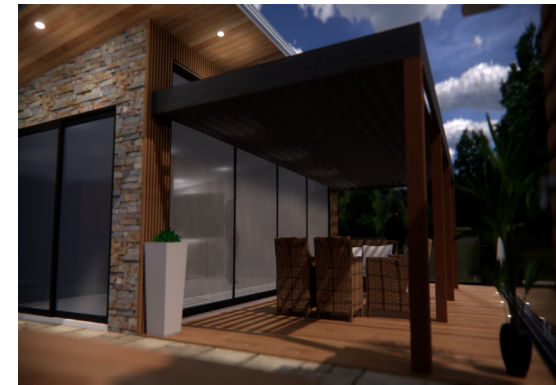

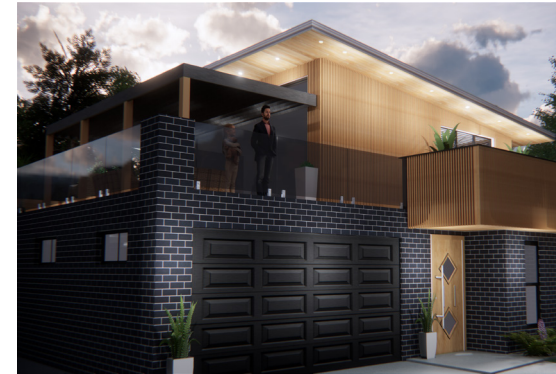

Ever heard of the phrase “Land, well they aren’t making any more of it”

We look no further... From the creators and expert specialists in green roof design, Auswide Building & Construction is proud to release “SKYGARDEN”

Innovative, fresh and green, it’s the new leader in home design construction that exposes the lost space housed by conventional roof design. Swapping out the old with the new, it boasts a robust green space, panoramic views, seamless connects between indoor and outdoor spaces evoking welcomed emotions complimenting the sense of place into your own home. With so much space never before available we can tailor the SKYGARDEN to compliment any lifestyle.

Sourcing the latest in 3D modelling software and partnering with Australia’s leading 3D modelling software we generate custom 3D walkthroughs of your home long before the construction phase begins. This allows you to gain a complete understanding of the relationship between flow, space, emotion and the aesthetics of your family home. No more guessing, no more unexpected construction costs that constantly floods 2D design documentation.

SKYGARDEN

“Skygarden rooftop can be designed into any style of home”
